Professional Summary

Data Science and AI undergraduate specializing in **computer vision, machine learning and deep learning**, with experience building real-time ML systems and medical imaging models achieving **90%+ accuracy**. Skilled in **data analysis, preprocessing, and model development** using TensorFlow, YOLOv8, and MediaPipe, with a focus on scalable, production-ready solutions.

Education

ICFAI Foundation for Higher Education — Donthanpalle, Telangana
Bachelor of Technology in DS and AI — *2022 – 2026*

Narayana IIT Academy — Kondapur, Telangana
Board of Intermediate Education (MPC) — *2020 – 2022*

Silver Oaks International School — Bachupally, Hyderabad
Central Board of Secondary Education — *2019 – 2020*

Skills

Languages: Python, SQL, HTML, CSS
ML/CV Frameworks: TensorFlow, OpenCV, MediaPipe, YOLOv8
Developer Tools: VS Code, Google Colab, Jupyter Notebook, Kaggle Notebook
Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
Additional Skills: Git, Streamlit, REST APIs, SEO, Digital Marketing

Projects

Real-Time Attention Monitoring System | *Python, MediaPipe, YOLOv8, OpenCV*

- Built a real-time system classifying users as **Attentive, Distracted, Sleepy, or Tired** at **30+ FPS**.
- Detected fatigue and yawning using **EAR/MAR** with MediaPipe (468 facial landmarks).
- Implemented **gaze tracking** to identify distraction with **90%+ accuracy**.
- Reduced redundant detections by **60%** using **YOLOv8 segmentation** with PCA and cosine similarity.

Squint Eye (Strabismus) Detection | *Python, MobileNetV2, TensorFlow, MediaPipe, Streamlit*

- Built a **MobileNetV2-based** model detecting strabismus with **92%+ accuracy**.
- Improved model precision by extracting eye regions using **MediaPipe landmarks**.
- Developed a **Streamlit web app** delivering predictions in **under 2 seconds**.
- Ensured robustness via fallback to full-image analysis when landmark detection fails.

Microhabit Deviation System with AI Companion | *Python, ML, NLP, Full-Stack*

- Built an ML-driven system to track microhabits and detect behavioral deviations using pattern analysis on user activity logs.
- Developed an **AI companion** using NLP to generate personalized recommendations, reminders, and corrective strategies.
- Implemented deviation detection logic based on historical trends to identify inconsistencies such as missed tasks and declining performance.
- Built a full-stack application using web interfaces, backend APIs, and persistent data storage to maintain user activity logs and support long-term habit tracking.

Colorization of Images | *Python, Deep Learning, OpenCV*

- Built a deep learning model for image colorization; applied pre-processing and augmentation to improve generalization across diverse inputs.

Internship

NextEra Unitech Pvt Ltd Jan 2026 – Present
AI/ML Intern *Hyderabad, Telangana*

- Worked on AI and machine learning solutions involving data collection, preprocessing, exploratory data analysis, model training, and performance evaluation.
- Applied TensorFlow, YOLOv8, and MediaPipe to develop and optimize computer vision and deep learning solutions.
- Integrated and utilized external APIs within AI workflows to support data processing and intelligent automation.

Medintu Health Solutions Jun 2024 – Aug 2024
SEO Analyst

- Improved search rankings to **top-5 positions** through on-page and off-page SEO strategies.
- Increased **organic traffic by 30%** via keyword analysis and content optimization.

Certifications

NASSCOM Future Skills: Acquiring Data | Exploratory Data Analysis | Data Processing and Visualization
Kaggle: Intro to Programming | Python

Extra-Curricular Activities

National Cadet Corps (NCC) – Air Force Wing 2018 – 2020
Cadet

- Achieved the NCC **'A' Certificate**; participated in camps and developed leadership, teamwork, and discipline through parades and drills.
